

Zirkonzahn[®]

Human Zirconium Technology

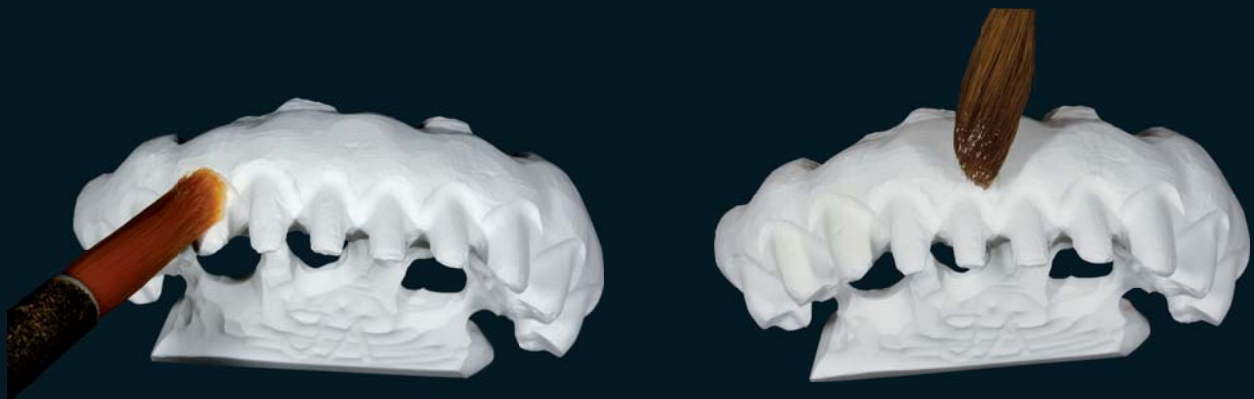

ALL ZIRCONIA

Pre-sinter Colouring

Milling procedure complete, the bridge frame is cut from the block. Labial contours are refined, but a support base for sintering remains.

The frame is coloured in various shades with Zirkonzahn Colour Liquids. Extra care is taken in defining the border between dentin and tissue areas. After colouring the frame is dried under an infra-red heat lamp for 60 minutes then placed in the sinter furnace in vertical position.

Result after Sintering

Master Technician Juergen Auffarth, Salzburg – Austria
