**100% PRETTAU<sup>®</sup> ZIRCONIA**

## *A lower patient-removable full denture – guaranteed to last*

The idea was to produce a bar-born removable lower restoration made entirely from ceramic material. Two zirconia bars were milled; both fitted with slide-attachments, one at each end. Through Teflon-sleeve matrixes over the attachments sufficient friction is achieved to hold the denture in place and give the desired stability. Such longevity is guaranteed.

The bars are milled by reducing a full-anatomical-contour mock-up frame; in this way optimal bar position within the restoration is ensured. The entire prosthesis is made from 100% full zirconia. Only the pink tissue was layered with veneer porcelain. The result is a Prettau® Bridge, worn over bars and entirely patient-removable.
